

# ASRCT Education Report 2010

## Canadian Cardiovascular Congress October 2010 in Montreal 40 years for CSCT!!!!!!!!!!!!!!

1. The CSCT Exam Committee has spent the last two years up dating and correcting all Exam information to Students and Preceptors. Handbooks, processes for the exam have all been reviewed and corrected. During this review and update they developed a slide presentation that each CSCT Coordinator can review with each Preceptor that oversees the CSCT Exam to be sure that all Provinces are getting the same information.
2. CSCT has also developed an Education Brochure that will be available (I think) June of 2010.
3. The Exam committee is looking for ECGs to up date information on the CSCT exam, specifically they need atrial flutter 2:1, 3:1, as well as 12 leads with pericarditis, aneurysm, and serial tracings for MIs. Please forward to Wendy at [wendygrant943@gmail.com](mailto:wendygrant943@gmail.com) or mail to R. R. # 4 Red Deer Alberta T4N 5E4 by June 4<sup>th</sup> 2010.
4. CSCT June meeting there will be an extra day to review exam questions, I am looking for questions with clear answers, it is important not to try and have any trick questions for the students, please forward any suggestions and I will submit to the CSCT exam committee. Along this same path, we need interesting case studies, history, diagnosis and treatment, one or two pages.
5. We have seven students writing May 1<sup>st</sup> for Alberta. The exam is held at Devry College in Calgary. For those students that have struggled being successful writing the CSCT exam, each school has provided further Education for each student. After the October set of exams we should be able to see if the further Education improved the percentage of passing.

Respectfully Submitted,  
Wendy Wilson
